

# LACMA LIGHTS SHOOT PROMPT LIST

## Dynamic Depth

Experiment with depth of field to emphasize different rows of lamps, creating a dynamic sense of perspective.

## Abstract Patterns

Look for abstract patterns and shapes within the installation, highlighting its artistic and architectural qualities.

## Colorful Contrast

Seek out colorful elements within the installation or its surroundings and contrast them against the black-and-white aesthetic of the lamps.

## Cropped Compositions

Frame your shots so that only a portion of the installation is visible, creating an abstract or minimalist composition.

## Diagonal Cropping

Experiment with diagonal cropping, cutting across the rows of lamps or other elements to create dynamic and unexpected compositions.

## Negative Space

Explore the use of negative space by cropping the installation in a way that emphasizes the empty areas around it, allowing viewers to focus on the lamps themselves.

## Framing with Architecture

Use nearby architectural elements, such as buildings, to naturally frame the "Urban Light" installation, exploring how this affects the composition.

## Minimalist Symmetry

Create a minimalist, symmetrical composition by cropping the installation in a way that showcases its perfectly aligned rows of lamps.
